## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3-15, 16- 28, 29-30, drawn to method and system and a computer-readable storage medium for carrying out a sponsorship exchange, classified in class 705 subclass 01.
- II. Claim 2 , drawn to method for carrying out a sponsorship auction, classified in class 705, subclass 01.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions in Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the invention of group I is directed to method and system and a computer-readable storage medium for carrying out a sponsorship exchange to allow an event owner to receive a service, non-monetary asset from a provider for use in presenting an event in exchange, while invention of group II is directed to method for carrying out a sponsorship auction.

Because these inventions are independent or distinct for the reasons given above, because the search required for Group I, is not necessarily required for Groups II due to their different scope and subject, and vice versa, restriction for examination

purposes as indicated is proper since it's a serious burden for the examiner to examine all of these amended claims.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention, either group I or II, to be examined even though the requirement be traversed (37 CFR 1.143)
